Preface

Motivation

We are happy to welcome the publication of *Medical Terms – Mawu a za Chipatala*, conceived and supervised by the Malawi Liverpool Wellcome Programme (MLW).¹

The list of medical terms is designed to enable the use of standard and culturally adapted vocabulary in translations of research materials, data and related information, from English to Chichewa and vice versa, to support effective and ethical research and public engagement in communities and also to support effective and culturally comprehensible communication with participants in research sites, particularly when a researcher may be from a different cultural setting and where direct translation may not be easy. The project has been led by the Behaviour and Health Group, and Data Management and Support Unit (DMSU) at MLW.

This is an ongoing project, and we plan to continue updating the list of Medical Terms as new words for inclusion are identified, or if alternative translations are suggested and agreed on. The responsible editors for this dictionary are Fanny Kapakasa and Rodrick Sambakunsi. Please, share your comments and suggestions, via the MLW intranet page or by contacting Fanny Kapakasa at fkapakasa@mlw.mw or on cell phone no. +265 999 210 085.

¹ The Malawi Liverpool Wellcome Research Programme is one of five major overseas programmes core-funded through the Wellcome Trust: a London-based organisation for medical research, named after the pharmaceutical magnate Sir Henry Wellcome (1853-1936). On his death, the Trust was established with legacies to fund medical research and the improvement of health across the UK and overseas. The vision of the MLW programme is to conduct excellent research to benefit health in Malawi and beyond and to train the next generation of researchers.

Acknowledgements

The proposal for composing the medical vocabulary was made by Dr Nicola Desmond in 2014, in response to recognition of the need for consistent translation of often complex medical terms from English to Chichewa and vice versa, and the lack of publications available to support this work. With her expertise, Fanny Kapakasa, the Senior Translation and Transcription Coordinator at MLW, then took over and began to collate medical terms into a ‘living document’. Malawian stakeholders from basic science, clinical medicine, public health, social science, and public engagement participated in the development of the list of words with support from lexicographical experts. Their participation brought a range of expertise and experience and helped to ensure that the resulting list could support the work of multiple organisations and across multiple disciplines.

We have been cooperating with Dr Steven Paas, who published the *Oxford Chichewa Dictionary*.² He provided us with linguistic and lexicographical advice. With the permission of Oxford University Press, he included a considerable number of entries that are in his Dictionary. Moreover, he included many more items that he had collected in his files. He had planned to compile a modest but practical collection of medical terms. The idea was born in the years 1997-2005, when material was collected by him for the publication of general dictionaries English–Chichewa/Chinyanja and Chichewa/Chinyanja–English. He was motivated by a linguistic interest and by the theological conviction that God entitles users of Chichewa/Chinyanja to be informed in their language on the important issues of life. Dr Paas does not claim any scientific

² Steven Paas, *Oxford Chichewa Dictionary*, fifth edition, Cape Town: Oxford University Press (OUP) – ORBIS, September 2016, 1158 pages. ISBN: 978-0-19-041659-1. The dictionary is also accessible online: <https://translate.chichewadictionary.org/>

knowledge in the medical field, but he was fortunate to find many helpers who assisted in various degrees and aspects. He gratefully mentions some contributors to this lexicographical project in alphabetical order: Marjan van den Bos, Amos Chauma, G. Chilembwe, Maxford Blessings Chilindeni, Helix Paul Welengani Goba, Andrew Goodson, Naomi de Jonge-Vink, Martin Malikebu, Dexter Mandala Maseko, Frackson Ntawanga, D. Pandya, Carolyn Pickson, Faith Saidi. Now, Dr. Paas is very happy to contribute his collection to the MLW vocabulary and cooperate with the medical experts of Malawi who have professionalised the vocabulary.

The other stakeholders include the Ministry of Health-Bangwe Health Centre, the UNC Project, John Hopkins, Action Aid, the Malawi University of Science and Technology (MUST), and the MLW Translation Advisory Group (Pauline Mlogeni, Professor Henry Mwandumba the Director of MLW, Vella Kaudzu, Tiferanji Sochera, Florence Shumba, Rodrick Sambakunsi, and Dr Moses Kumwenda, Dr. Elias Phiri). Words for inclusion in the dictionary were suggested by this stakeholder group and collected from MLW study materials. The standard translations of these words were approved by all stakeholders and special appreciation to Isabel Kulanga, Dr Kondwani Mkandawire, Peter Jiyajiya, Daniel Gondwe, Sufia Dadabhai, Dr Marion M. Chirwa Kajombo, Esnath Mkandawire, Gladson Mopiwa and Kondwani Mshali.

We are grateful to the MLW Translation and Transcription Team (special thanks to Diana Mwaipaya, the late Catherine Amasi and Nengezi Chirwa), the MLW Translation Advisory Group, Oxford University Press, and all other stakeholders for their time in supporting this project. We also thank Wim Paas, who made the layout and contributed to the cover design.

Notation

We have limited the use of capital letters to proper names. Traditional **W** has become **w**.

We have chosen an easy system of symbols to indicate categories of words and for punctuation:

- this sign replaces 'ku' in the infinitive of Chichewa verbs; it replaces 'to' in the infinitive of English verbs; it is put before adjectives in Chichewa instead of the concordant prefix; it is also put after the indication of the plural prefix of nouns.

-amputate -dula ziwalo
-bear child -bereka

toxic -ululu
big -kulu

**** this sign is put after Chichewa nouns, and is followed by their plural prefix, indicating the class to which they belong.

ankle msomali\mi-
